

Lab Tasks

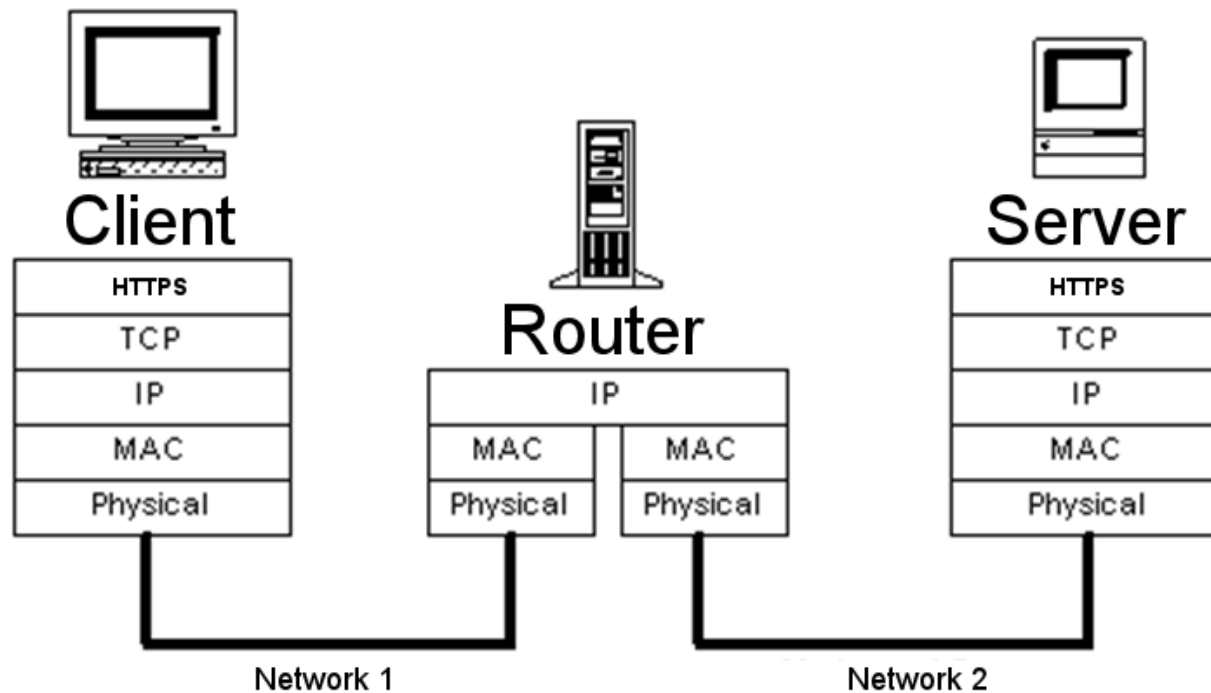

MI102 - Network Systems and Security

Fachhochschule Kiel

Florian Caspar

Task 3 (1)

- Use the network architecture from Task 2:

Task 3 (2)

- Set up the following VPN servers:
 - Linux:
 - PPTP or IPSec
 - OpenVPN or Wireguard
 - Windows:
 - SSTP or IPSec
 - OpenVPN or Wireguard

Task 3 (3)

- Set firewall configuration for the protocols.
- Connect client to server via VPN.

Task 3 (4)

- Configure client VM for Split-Tunnelling.

Task 3 (5)

- Use a second client VM to connect to the same VPN server as the first client VM.
- Ping second client VM from the first client VM using the VPN IP address.
