

Lab Tasks

MI102 - Network Systems and Security

Fachhochschule Kiel

Florian Caspar

Task 4 (1)

- Download either:
 - IT-Grundschutz-Kompendium
 - OR
 - ISO 27001
- Understand the purpose of the standard.

Task 4 (2)

- The network architecture of Lab Tasks 1 and 2 is called „environment“.
- Describe the environment in words.
- Draw a network architecture plan of the environment.

Task 4 (3)

- Locate the applicable requirements in the standard for the environment.
- Locate the applicable checklists in the standard for the environment.

Task 4 (4)

- Develop a concept for implementing the security guidelines.
 - You shall write a short document (about one page) which contains a list of requirements your environment shall implement.
